This fan-fiction article, **Macrobe**, was written by [Witcher190](#). Please do not edit this fiction without the writer's permission.

A **macrobe** (in Scholarly Language: *macrobium*) is a hypothetical organism, conceptually proposed as the opposite of a microbe. Unlike known multicellular organisms, such as animals or standard sentient beings macrobes would operate on a completely different biological scale, far beyond the three dimensions that living beings experience. These theoretical beings, due to their immense size, would be practically imperceptible to sentient beings—not because of their smallness, but because of their vastness and existence in additional dimensions or unknown spheres. Their biology, structure, and ecology are thought to be entirely alien to any known form of life, existing beyond any conceptions of life that various races might have.

## Macrobes and Divinity

A speculative theory suggests that what human and other sentient races' cultures interpret as divinities could, in fact, be a fragmented and incomplete perception of a macrobe. Due to their immense scale and possible existence in higher dimensions, humans and other species might only perceive partial aspects of their influence, which would be interpreted as miraculous or divine events. According to this hypothesis, the divine entities worshiped in different cultures and races are not supernatural beings in the traditional sense, but limited manifestations of interaction with one or more macrobes that inhabit, as previously mentioned, higher dimensions or unknown spheres.

In this view, macrobes would exist on a far higher existential level, even beyond the [elemental](#), para-elemental planes, and beings like genies, spirits, or demons. In fact, these latter beings might be minor components of a macrobe, similar to how various cells make up tissues, and tissues make up organs that ultimately constitute a more complex organism. In this case, spirits and entities from other planes would, collectively, be part of a macrobe, functioning as integral elements of its vast multidimensional "body."

## Interactions with Sentient Beings

It has been suggested that macrobes may not be aware of their interactions with humans or other sentient races, such as [dwarves](#) or elves, as the phenomena we attribute to the divine might simply be side effects of their existence or large-scale biological processes. Cosmological phenomena such as fluctuations in space-time, variations in dark matter, or disturbances in cosmic energy might be manifestations of their metabolism or their movements on a cosmic scale. Just as a microbe in the human body may perceive changes in its environment without understanding they are caused by the behavior of a larger organism, sentient beings may be experiencing the indirect effects of macrobes without being able to grasp their true nature.

According to this theory, the religions, mythologies, and beliefs of various sentient races would be attempts to symbolically and fragmentarily interpret the presence of these organisms. Because macrobes would exist in higher dimensions or scales that are practically incomprehensible, it would be impossible for sentient beings to perceive them directly with their senses or current technology. Only their indirect influences or the side effects of their activities could be detected. These manifestations could be interpreted in different ways depending on cultural, spiritual, or scientific contexts.

## Possible Macrobes

- **Demiurge:** The Demiurge is a hypothetical figure that could be considered a macrobe, according to certain philosophical and cosmological theories. In some interpretations, the Demiurge is the creator of the physical universe, responsible for shaping and ordering matter. This entity could be seen as a macrobe whose actions structure reality on a scale that sentient beings can barely comprehend. If the Demiurge were a macrobe, its influence would span multiple dimensions and be perceived in a limited way by conscious beings, who might attribute divine qualities to it due to their inability to grasp its true nature.

## Notes

- This is my attempt to integrate divine matters into The Witcher universe, respecting what Sapkowski stated about The Witcher, where "gods don't exist as such, only beliefs."

## Trivia

- The concept of a demiurge is mentioned in *The Witcher* novels, more specifically in The *Tower of the Swallow* and *The Lady of the Lake*.
